EDUCATION

•**Dr. A.P.J. Abdul Kalam Technical University**   *2022-24*
Masters in Computer Applications)   CGPA: 6.0

•**Dr.B.R.Ambedkar University**   *2019-22*
Bachelor of Computer Application   Percentage: 68

EXPERIENCE

•**Software Engineer**   *June 2022 - Present*
Jobaaj

  – Solely managed the development and maintenance of stories.jobaaj.com a **React.js**-based platform. Executed end-to-end responsibilities, including design enhancements, feature implementation, and ongoing upkeep.
  – Optimized asset storage by migrating to **AWS S3**, integrating CDN, and reducing server costs by 50%.
  – Migrated a project to **Express.js** and **deployed** it on **AWS**, leveraging **Nginx** for hosting, implementing necessary configurations and **server-side functionality**
  – Collaborated within a **four-member team** to develop an internal **RMS** (Resource Management System) for the consulting team using **PHP**, **jQuery**, **AJAX**, **Bootstrap** and **MySQL**.
  – Implemented optimizations for RMS resume page with **AJAX**, **Javascript**, resulting in a remarkable load time.
  – Implemented validation procedures on **frontend** and data sanitization protocols in **backend** before database operations in **MySQL**, fortifying the system against potential security vulnerabilities
  – Develop and automate web scrapers using **Python**, **Selenium**, and **Beautiful Soup** to extract data, implementing special technique to **bypass IP blocking** and utilizing **PyAutoGUI** for additional **Automation** tasks.
  – Designed and deployed an innovative **Employee Management Portal**, streamlining internal processes and improving communication within the organization.

•**Software Engineer**   *Apr - June 2022*
Jobaaj

  – Spearheaded the development and implementation of a comprehensive **Admin Panel for the HR Department**, revolutionizing job management processes within the company portal.
  – Engineered and optimized seamless **payment gateways**, enhancing sales funnel **efficiency and ensuring smooth**, secure transactions for clients.
  – Drove business revenue through strategic website initiatives, increasing organic traffic and optimizing user experience for maximum engagement and conversion.

PERSONAL PROJECTS

•**Resume Builder**

A Portal to Build Dynamic Resume.   [GitHub]

  – Developed a resume builder application using PHP, MySQL, and JavaScript. Implemented dynamic form handling, database management, and user interface design for seamless user experience.
  – Technology Used: JavaScript, PHP, MYSQL, REST API, Bootstrap.

•**Bubbler**

JavaScript game that demonstrates Event Bubbling in an interactive manner   [Link]

  – The application features dynamically generated bubbles and numerical elements, requiring user interaction within specified time constraints.
  – Technology Used : JavaScript , CSS, HTML.

TECHNICAL SKILLS

Languages: C/C++, JAVA, Javascript
Libraries : C++ STL, JQuery, ReactJs, Python Selenium
Web Dev Tools: Nodejs, VScode, Git, Github
Cloud/Databases:AWS, Relational Database(MySQL)
